PAUL M. ROTHERMEL, JR.
SECURITY OFFICER

Dear Harold

The articles of June Rean. My recall is not perfect but somewhere of Kaline Lowery was a JBS member who was planted on CP. then Bureau started using him - after he became bad - to handle the Bureau at Dem losse - Lowery made a series of speeches around Dallas - I don't know where he is now. The above may not be exactly correct and I think the story came from a JBS member after Lowery was surfaced -

Molina was with the DI Forum To understand why Molina occupies such an important role in things consider this He was one of 6 people in a CP cell - 4 were informers - FBI - I-DPS 1 - Dallas PD and 1 for JBS. Everyone reports on everyone else - Hence get bigger and better - Each dept that got the info from its informant probably editorialized some. At least 3 of them did. The end result was when each agency checked with the other they came up with Molina - And

you know he worked at Texas Book Depository. Well you can see the consequences 1+3=5 and you go on from there. The CIA in Texas is so weak that only Wardell Addington and John Stanford were even completely free of information. At least 50% of all CIA members in Texas were informants at one time. That ought to tell you something. I can't prove it as I can even do it but I do believe my sources -

About your book - I enclose $10.00 Send it to me - Also I think I'm ready to publish one - Any suggestions?

Jim

P.S. Please make yourself a copy & return to me Ok Austin Taylor - Touchstone Letter
